Hollandia Elite Bed

Stay in bed

What's better than a bonafide reason to stay in bed? The Elite Bed by Hollandia—with its DVD/CD changer, iPod docking station, a retractable Bravia 32-inch flat-panel TV and a surround-sound system—is your excuse to do just that.

But this bed is more than an exercise in horizontal entertainment, employing 12 massage programs, telescoping head support, and an automated head and foot adjustment system (which elevates each half of the mattress to take pressure off the lower back) to help ensure a restful sleep when you're not watching or listening to its other features.

It also offers an appealing ergonomic platform for reading or working, according to Hollandia Vice President Maya Ben, who says, "This bed becomes an integral part of your life. I work in my bed with my laptop all the time—it's amazing."

The bed, available in queen and king sizes, can be upholstered in more than 200 fabrics.

PRICE: Queen (shown) \$30,000; king \$35,000
