Lots of companies try to make their beds unique by making them out of crazy space foam or giving them pockets of air like a big Nike sneaker, but Hollandia International snazzed-up their bed the old fashioned way, by cramming it full of electronics. The Elite bed system is available with "a state-of-the-art Sony Bravia Theater System, DVD/CD changer, 5 Speaker Surround Sound System, Subwoofer, massage system and an iPod Docking Station." They also have more than 200 different fabrics to choose from so in case you care about it matching your room, which by the way, you shouldn't. At all. If you have a bed with a TV built into it, there's no reason to think about the fabric, ever. **Check out their site for more info** and then, if you're like me, feel very embarrassed that you sleep on an air mattress that's composed mostly of duct tape.
