Mom Find: Swaddle Yourself in a Kangaroo Blanket

Category: **Mom**

What: [Hollandia Kangaroo Blanket](#)

Why: After a long day, all I want to do is veg out in front of the TV and watch my favorite shows commercial-free on TiVo. And I usually spread out on the couch with a blanket over me. It's not just any blanket I use. It's a Kangaroo Blanket. Treated with Aloe Vera to make it extra soft, it feels so cozy underneath that it's probably the adult equivalent of being swaddled. My feet never get cold because there's a deep pocket sewn on the blanket, and the same goes for my hands. Two pockets are sewn on top. It's big enough to cover your entire body, but small enough to take with you if you travel. Hey, if baby gets to take her lovey on trips, so does mommy.

Price: \$150
